IN THE CLAIMS

14. (Previously Presented) A pharmaceutical composition obtained from the green or mature fruits of *Roystonea regia* comprising:

a mixture of primary fatty acids with 8 to 28 carbon atoms, the fatty acid selected from the group consisting of caprilic acid (C8:0), capric acid (C10:0), lauric acid (C12:0), miristic acid (C14:0), palmitic acid (C16:0), palmitoleic acid (C16:1), estearic acid (C18:0), oleic acid (C18:1), linoleic acid, and linolenic acid; and

a mixture of esters of the fatty acids;

wherein free fatty acids are enriched from esters hydrolisis.

15. (Previously Presented) The pharmaceutical composition according to claim14 comprising:

Miristic acid (C14:0)
$$4.0 - 15.0 \%$$

16. (Cancelled) A method for the obtention of the pharmaceutical composition obtained from *Roystonea regia* according to claim 14 comprising:

drying, grounding, and sieving the *Roystonea regia* fruits, and separating of the extract from other components through a solid/liquid extraction in organic solvents,

wherein the organic solvents are chosen from hydrocarbons of 5 to 8 carbon atoms, alcohols of 1 to 3 carbon atoms, and mixture thereof, with or without a previous basic hydrolysis using hydroxides or alkalis.

17. (Cancelled) The method according to the claim 10 wherein the drying of *Roystonea regia* fruits is at a temperature between 16 and 100°C for a time span ranging from 1 to 1000 hours, and

the grounding is to obtain a particle size < 6000 μ m; the extraction is for 1 to 50 h at a temperature from 0 to 70° C.

- 18. (Cancelled) The method according to claim 16 wherein the hydrolysis includes the use of alkaline- hydroxides or alkaline-earthen hydroxides and organic for the basic hydrolysis, specifically those of low molecular weight selected from the group consisting of sodium, potassium, calcium or ammonium hydroxides.
- 19. (Cancelled) The method according to claim 16 wherein the hydrocarbons are selected from the group consisting of pentane, hexane, heptane, or octane.

- 20. (Cancelled) The method according to claim 16 wherein the alcohol is selected from the group consisting of methanol, ethanol, n-propanol, and 2-propanol.
- 21. (Cancelled) A method for treating and/or to prevent BPH, prostatitis, alopecia and hirsutism comprising administering a medication comprising the pharmaceutical composition according to claim 14.
- 22. (Cancelled) The method according to claim 21 wherein the pharmaceutical composition is with or without a saponification.
- 23. (Cancelled) The method of claim 21 wherein the medicament is administered at daily doses from 50 to 1000 mg.
- 24. (Cancelled) The method of claim 21 wherein the medicament is administered at doses between 150 and 1000 mg.
- 25. (Cancelled) The method of claim 21 wherein the medicament is administered as solid oral forms (capsules, soft-gel capsules, tablets), liquids (emulsions), suppositories, tinctures, lotions, or shampoos of local action.
